Evidencias codelab: Virtual Threads

Consola con logs comprobando que se esta usando virtual Threads

Resultado del Jmeter:

The screenshot shows the Apache JMeter 5.6.3 interface with the 'View Results in Table' option selected. The table displays the results of a test plan, including sample numbers, start times, thread names, labels, sample times, status, bytes, sent bytes, latency, and connect times. The test results show a series of HTTP requests being executed by a thread group, with the status column indicating that all requests were successful (green checkmarks).
